Leverage the power of
software modeling

Astah's modeling tools allow you to visualize the essence of your ideas and software designs. Quickly and effortlessly build diagrams that create a clear understanding among teams. Build UML, ER diagrams, Data Flow Diagrams, Flowcharts, mind maps and more in the most powerful modeling software for everyone from students to enterprise teams.

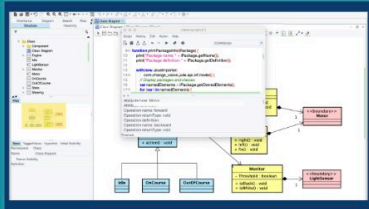

Make Diagrams Fast

Draw clean diagrams with ease. You will be surprised how easily and swiftly you can draw clean UML diagrams with Astah including:

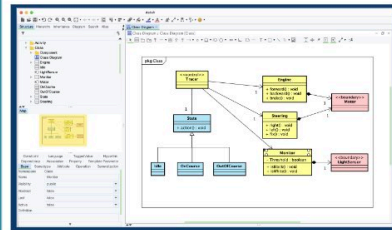

- Class Diagram
- Communication Diagram
- UseCase Diagram
- Component Diagram
- State machine Diagram
- Deployment Diagram
- Activity Diagram
- Composite Structure Diagram
- Sequence Diagram
- Data Flow Diagram
- Entity-relationship Diagram
- Flowchart
- Requirement Diagram
- Requirement Table
- Mind Map
- CRUD

Easy to Learn, Easy to Use
Work quickly and efficiently with assist functions.

We've been incorporating user feedback for more than 10 years. The result is a powerful software program that is incredibly easy to use. Astah Pro offers a variety of "assist" functions to make your work faster, including:

- Auto-create class diagrams
- Alignment guides
- Copy to MS Office documents
- Auto-layout
- Customizable shortcut keys
- Traceability map
- Gap expander/remover
- Compare projects
- Map view
- Merge project files
- Search and replace
- Show related classes/models
- State transition path & table
- User-defined tagged value

Expand and Customize with API
Big library of plug-ins & integrations

Plug-ins

You can customize Astah Professional with a vast library of plug-ins and integrations.

Plug-ins are available for code generation, reverse engineering, exporting, importing, state transitions, usability, and more.

In-App Script Editor

The Astah API enables you to obtain Astah model information, create and modify diagrams and models, and use them in application software.

In addition, you can directly access models using scripts via Script Editor with-in application.

Generate or Reverse Engineer Code

Bring your concept to life with our code generation tools, or work backwards and reverse engineer your project to create a model. Astah supports reverse engineering of Java, C#, and C++. Generate PHP, SQL and other languages.

Collaborate with Team Members

Work with all types of teams, from in-house, to remote, to offshore! Our tools allow you to lock files, merge files, compare diagrams and models, work in multiple languages, and import other projects as read only for reference.

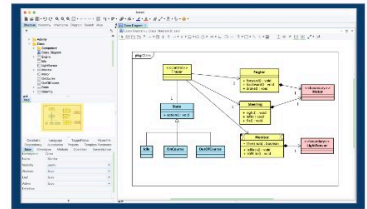

Clean and Attractive Diagrams

Any drawing tool can create nice-looking diagrams. Astah keeps your design model visually pleasing and accurate. Our diagrams are easy to read and understand with a clean and modern look that's easy on the eyes!

Export and import in various formats

Export the diagrams you create in Astah Pro to a variety of formats, including image files (jpg, png, emf, and svg), RTF documents, HTML, Entity Definition Report, and XML.

You can also copy and paste into Microsoft Office documents and print with customized settings.

Communicate with Precision

Astah Professional offers “expressions” that help you customize your layout and design. This makes your working environment friendlier, and improves the clarity of communications.

Expressions include use case descriptions, alias names for models, font settings, customizable icons, mini icons, highlighter/marker pens, and free writing tools.
