

Astah SysML

Versatile, User-Friendly MBSE Tool for systems engineers.

WHY CHOOSE ASTAH SYSMML?

ABOUT ASTAH SYSMML

Astah SysML is an intuitive and powerful systems modeling tool designed for systems engineers. It supports all SysML diagrams and offers an API for extensibility and flexibility, enabling you to use and modify models in other applications via scripts within Astah.

KEY FEATURES:

- SysML Compliance
- Easy-to-Use Interface
- Customization with API
- Interoperability with other tools
- Free Plug-ins

COMPREHENSIVE MODELING:

Supporting all essential SysML diagrams for systems modeling.

USER-FRIENDLY:

Intuitive interface with drag-and-drop functionality, customizable via API.

INTEROPERABILITY:

Integration with tools such as Cameo Systems Modeler.

TESTIMONIAL:

"I and my students are using your tool. It's nice that it focuses on SysML. Installation is a breeze and your online manual is very helpful."
 - James, UC San Diego
